SUMMARY

Senior software engineer with 10+ years of experience working on web platforms, APIs, and payments systems. Takes technical ownership of complex initiatives, coordinating across teams, and dealing with production issues so projects keep moving. Strong experience in payments, distributed systems, and production support.

WORK EXPERIENCE

Storable   *Remote*
Senior Software Engineer / Tech Lead   *October 2022 - Present*

-   Delivered multiple cross-team payments initiatives spanning MFEs, async processing, and international payment processors (in the UK and Canada), working day-to-day with product, payments, QA, and platform engineers.
-   Functioned as the technical point person on complex initiatives, making architecture calls, identifying and closing design gaps, spending a lot of time in code reviews, and debugging to get our code production-ready.
-   Wrote and owned technical designs for large projects, partnering closely with relevant product and architecture teams to resolve unknowns before implementation.
-   Frequently handled high-priority interruptions and production incidents, taking point on investigation and cross-team coordination so the rest of the team could stay focused on planned work.
-   Worked on core platform improvements, including a major API rework backed by database views, a CDC-backed data shipping system and product internationalization.
-   Helped keep the team running smoothly through mentorship, interviewing, and regular involvement in sprint planning, ticket refinement, and estimation.

Fresh Technology, Inc.   *Remote*
Senior Software Developer   *September 2021 – September 2022*

-   Built and maintained microservices and APIs using Node.js, Express, and PostgreSQL to support SaaS products in the restaurant industry.
-   Maintained and extended a customer-facing web application using React, Redux, and SCSS.
-   Participated in agile development processes including sprint planning, code reviews, and daily collaboration.
-   Assisted junior developers with problem solving and adherence to development standards.

NCR   *Athens, GA*
Senior Web Developer (2016 – 2021)   *July 2014 - September 2021*
Web Developer (2014 – 2016)
- Implemented 30+ client websites per year using PHP, JavaScript, HTML, and CSS for financial institutions.
- Built internal admin tools using WordPress hooks, APIs, and custom PHP to enable customers to self-manage content..
- Developed automation and tooling using Python, Node.js, and Bash to improve team productivity.
- Supported and maintained a portfolio of 250+ production websites.
- Contributed to coding standards, best practices, and team documentation.

BlakSheepDesign   *Remote*
Contract Web Developer   *2013 – 2023*
- Built and maintained client websites based on designer specifications.
- Extended WordPress functionality through custom plugins and integrations.
- Applied modern HTML, CSS, and JavaScript best practices.

EDUCATION

University of Georgia - GPA: 3.59   *Athens, GA*
Graduate Degree in Computer Science   *2011-2014*
No degree earned

Kutztown University - GPA: 3.77   *Kutztown, PA*
Bachelor's Degree in Computer Science – Software Development   *2007-2011*
Magna Cum Laude

SKILLS

Languages: Ruby/Rails, PostgreSQL, Javascript (Node.js), PHP, Python, Bash, Java
Web Tech: React, Vue, Next.js, REST APIs, Docker, RabbitMQ, Redis, Elasticsearch, CI/CD (GitHub Actions, Jenkins, TeamCity), RSpec, WordPress, Laravel, HTML/CSS
